OBJECTIVE

A highly adaptable, results-driven technologist with a B.Sc. in Computer Science and a unique background bridging traditional IT support and full-stack software development (Web2) with advanced Web3/Blockchain concepts. Proven ability to architect and deploy user-facing applications using HTML, CSS, JavaScript, PHP, and MySQL. Deeply knowledgeable in Smart Contract Basics (Solidity), DAO Governance, and DeFi/Arbitrage Trading, focused on building secure, scalable, and value-driven decentralized systems.

EXPERIENCE

KWARARRE LAND AGENT AND PROPERTIES NIG. LTD.

2025 -

Developer

KWARARRE LAND AGENT.

Designed and developed the Kwararre Land Agent website (www.kwararrelandagent.com), creating a robust online platform for real estate listings and client management.

Managed the full development lifecycle, from conceptual layout to deployment, utilizing HTML, CSS, JavaScript, PHP, and MySQL for comprehensive functionality.

YUKASTOPUP

2023 -

Developer

YUKASTOPUP VTU Platform

Architected and developed the full-stack VTU (Virtual Top-Up) platform, enabling users to seamlessly purchase airtime, data, and pay bills.

Managed core infrastructure, databases, and user authentication portals using a LAMP stack (PHP & MySQL).

Designed and implemented user-friendly landing pages and dashboards with HTML, CSS, and JavaScript.

Gas4Token

2023 -

Developer

Gas4Token Dashboard

Developed a customized crypto gas fee system (Gas4Token dashboard) to provide users with transparent, real-time tracking of transaction costs.

Ministry at Audu Bako Secretariat, Kano State

2022 -

SIWES Intern

Resolved hardware and software issues for departmental users, minimizing disruption and ensuring maximum operational efficiency.

Provided fundamental IT support, including basic network operations and system troubleshooting/maintenance across multiple internal systems.
